

WHAT IS CLAIMED IS:

Sub B1
1. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition
including a first portion comprising an antiperspirant salt and a second portion comprising an
antiperspirant salt, the second portion having a different composition than the first portion,
the first portion and the second portion each independently comprising at least 15% of the
application surface.

2. The product of claim 1, wherein the first portion and the second portion each
independently comprises at least 25% of the application surface.

3. The product of claim 1, wherein the first portion and the second portion each comprises
at least 6 USP weight percent of the antiperspirant salt.

4. The product of claim 3, wherein the antiperspirant salt is an aluminum or an aluminum
zirconium salt.

3
5. The product of claim 1, wherein the second portion is in the form of a lengthwise-
extending stripe extending approximately from a first end of the application surface to a
second end of the application surface.

4
6. The product of claim 1, wherein the first portion has a different color than the second
portion.

5
7. The product of claim 1, wherein the application surface consists of the first portion and
the second portion.

Sub B2
8. The product of claim 1, wherein the first portion comprises a volatile silicone, a high
melting wax, from 0% to 10% by weight of a hydrophilic vehicle, and from 6 USP
weight percent to 25 USP weight percent antiperspirant salt, and the second portion
comprises a volatile silicone, a high melting wax, from 0% to 10% by weight of a

hydrophilic vehicle, and from 6 USP weight percent to 25% weight percent antiperspirant salt.

9. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition including a first portion comprising at least 6 USP weight percent antiperspirant salt and a second portion comprising at least 6 USP weight percent antiperspirant salt, the second portion having a different composition than the first portion, both the first portion and the second portion forming part of the application surface.

10. The product of claim 9, wherein the antiperspirant salt is an aluminum or an aluminum zirconium salt.

11. The product of claim 9, wherein either the first portion or the second portion is in the form of a lengthwise-extending stripe extending approximately from a first end of the application surface to a second end of the application surface.

12. The product of claim 9, wherein the first portion has a different color than the second portion.

13. The product of claim 9, wherein the first portion comprises a volatile silicone, a high melting wax, from 0% to 10% by weight of a hydrophilic vehicle, and from 6 USP weight percent to 25 USP weight percent antiperspirant salt, and the second portion comprises a volatile silicone, a high melting wax, from 0% to 10% by weight of a hydrophilic vehicle, and from 6 USP weight percent to 25 USP weight percent of the antiperspirant salt by weight.

14. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition including a first portion comprising an antiperspirant salt and/or a deodorant active ingredient

5 and a second portion having a different composition from the first portion, both the first
6 portion and the second portion forming part of the application surface, the first portion and/or
7 the second portion being optically clear.

1 15. The product of claim 14, wherein the second portion also includes an antiperspirant salt
2 and/or a deodorant active ingredient.

1 16. A product for underarm application, comprising
2 a container, and
3 a composition within the container having an application surface, the composition having
4 a first portion comprising an antiperspirant salt and a second portion comprising an
5 antiperspirant salt, the second portion having a different composition from the first portion,
6 the application surface consisting of the first portion and the second portion.

1 17. A product for underarm application, comprising
2 a container, and
3 a composition within the container having an application surface, the composition having
4 a first portion comprising a volatile silicone and a second portion comprising a volatile
5 silicone and an antiperspirant salt, the second portion having a different composition from the
6 first portion, the first portion and the second portion each independently comprising at least
7 15% of the application surface.

1 18. The product of claim 17, wherein the first portion further comprises an antiperspirant salt.

1 19. The product of claim 18, wherein the antiperspirant salt is an aluminum or aluminum-
2 zirconium salt.

1 20. The product of claim 17, wherein the first portion or the second portion is in the form of a
2 lengthwise-extending stripe extending approximately from a first end of the application
3 surface to a second end of the application surface.

Sub B3
21. The product of claim 18, wherein the first portion and the second portion each comprises at least 6 USP weight percent of the antiperspirant salt.

12
16
22. The product of claim 17, wherein the first portion has a different color than the second portion.

17
12
23. The product of claim 17, wherein the volatile silicone is a cyclomethicone.

Sub B6
24. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition having
a first portion comprising a volatile silicone and a second portion comprising a volatile
silicone and an antiperspirant salt, the second portion having a different composition from the
first portion, the application surface consisting of the first portion and the second portion.

25. The product of claim 24, wherein the first portion further comprises an antiperspirant salt.

26. The product of claim 24, wherein the antiperspirant salt is an aluminum or aluminum-zirconium salt.

20
19
27. The product of claim 25, wherein the second portion is in the form of a lengthwise-extending stripe extending approximately from a first end of the application surface to a second end of the application surface.

Sub B7
28. The product of claim 24, wherein the first portion and the second portion each comprises at least 6 USP weight percent of the antiperspirant salt.

22
18
29. The product of claim 24, wherein the first portion has a different color than the second portion.

23
19
30. The product of claim 24, wherein said volatile silicone is a cyclomethicone.

1 ~~24~~ 24. A product for underarm application, comprising
2 a container, and
3 a composition within the container having an application surface, the composition having
4 a first portion comprising a high melting wax and a second portion comprising a high melting
5 wax and an antiperspirant salt, the second portion having a different composition from the
6 first portion, the first portion and the second portion each independently comprising at least
7 15% of the application surface.

1 ~~25~~ 25. The product of claim ~~24~~ 24, wherein the first portion further comprises an antiperspirant salt.

1 ~~26~~ 26. The product of claim 25, wherein the antiperspirant salt is an aluminum or aluminum-
2 zirconium salt.

1 ~~27~~ 27. The product of claim ~~26~~ 26, wherein the first portion or the second portion is in the form of a
2 lengthwise-extending stripe extending approximately from a first end of the application
3 surface to a second end of the application surface.

1 ~~28~~ 28. The product of claim 27, wherein the first portion and the second portion each comprises
2 at least 6 USP weight percent of the antiperspirant salt.

1 ~~29~~ 29. The product of claim ~~28~~ 28, wherein the first portion has a different color than the second
2 portion.

1 ~~30~~ 30. A product for underarm application, comprising
2 a container, and
3 a composition within the container having an application surface, the composition having
4 a first portion comprising a high melting wax and a second portion comprising a high melting
5 wax and an antiperspirant salt, the second portion having a different composition from the
6 first portion, the application surface consisting of the first portion and the second portion.

1 ~~31~~ 31. The product of claim ~~30~~ 30, wherein the first portion further comprises an antiperspirant salt.

Sub B10
39. The product of claim 38, wherein the antiperspirant salt is an aluminum or aluminum-zirconium salt.

30
40. The product of claim 39, wherein the first portion or the second portion is in the form of a lengthwise-extending stripe extending approximately from a first end of the application surface to a second end of the application surface.

34
31
41. The product of claim 40, wherein the first portion and the second portion each comprises at least 6 USP weight percent of the antiperspirant salt.

35
30
42. The product of claim 41, wherein the first portion has a different color than the second portion.

Sub B11
43. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition having a first portion comprising from 0% to 10% by weight of a hydrophilic vehicle and a second portion comprising from 0% to 10% by weight of a hydrophilic vehicle and an antiperspirant salt, the second portion having a different composition from the first portion, the first portion and the second portion each independently comprising at least 15% of the application surface.

44. The product of claim 43, wherein the first portion further comprises an antiperspirant salt.

45. The product of claim 44, wherein the antiperspirant salt is an aluminum or aluminum-zirconium salt.

38
36
46. The product of claim 45, wherein the first portion or the second portion is in the form of a lengthwise-extending stripe extending approximately from a first end of the application surface to a second end of the application surface.

Sub B12
1 47. The product of claim 44, wherein the first portion and the second portion each comprises
2 at least 6 USP weight percent of the antiperspirant salt. 36

1 48. The product of claim 47, wherein the first portion has a different color than the second
2 portion. 36

1 49. The product of claim 45, wherein the first portion and the second portion each
2 independently comprises from 0% to 5% by weight of a hydrophilic vehicle. 36

Sub B13
1 50. A product for underarm application, comprising
2 a container, and
3 a composition within the container having an application surface, the composition having
4 a first portion comprising from 0% to 10% by weight of a hydrophilic vehicle and a second
5 portion comprising from 0% to 10% by weight of a hydrophilic vehicle and an antiperspirant
6 salt, the second portion having a different composition from the first portion, the application
7 surface consisting of the first portion and the second portion.

1 51. The product of claim 50, wherein the first portion further comprises an antiperspirant salt.

1 52. The product of claim 51, wherein the antiperspirant salt is an aluminum or aluminum-
2 zirconium salt. 42

1 53. The product of claim 50, wherein the first portion or the second portion is in the form of a
2 lengthwise-extending stripe extending approximately from a first end of the application
3 surface to a second end of the application surface. 44

Sub B14
1 54. The product of claim 51, wherein the first portion and the second portion each comprises
2 at least 6 USP weight percent of the antiperspirant salt. 46

1 55. The product of claim 50, wherein the first portion has a different color than the second
2 portion. 46

41
56. The product of claim 50, wherein the first portion and the second portion each
independently comprises from 0% to 5% of a hydrophilic vehicle by weight.

42
57. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition having
a first portion comprising at least 10% by weight of a hydrophilic vehicle and a second
portion comprising at least 10% by weight of a hydrophilic vehicle and an antiperspirant salt,
the second portion having a different composition from the first portion.

58. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition having
a first portion including a deodorant active ingredient and a second portion having a different
composition from the first portion, wherein neither the first portion or the second portion
includes an antiperspirant salt.

59. A product for underarm application, comprising
a container, and
a composition within the container having an application surface, the composition having
a first portion including a deodorant active ingredient and a second portion including a
deodorant active ingredient, and having a different composition from the first portion.

60. A product for underarm application, comprising
a container, and
a composition within the container including a first portion comprising a volatile silicone
and/or high melting wax and a deodorant active ingredient and/or fragrance and a second
portion comprising a volatile silicone and/or high melting waxes.
